PROFILE

Graduate student in Statistics and Computational Analytics at the University of Arkansas, combining telecommunications engineering with statistics, data analysis and applied AI. Experience preparing institutional datasets, producing analytical reports and developing AI workflows in multidisciplinary, international environments.

EXPERIENCE

AI Innovation Analyst GA | University of Arkansas

2026 - Present | Arkansas | Part-time

Develop and evaluate AI agents and proof-of-concept solutions with Microsoft Fabric, semantic models and enterprise data. Design prompts, retrieval strategies and evaluation methods to assess relevance, accuracy and usability.

Data Analyst GA | University of Arkansas, VCFA

2025 - Present | Arkansas | Part-time; Senior Graduate Assistant since 2026

Provide statistical and analytical support for strategic initiatives. Clean and validate structured datasets, develop reports and dashboards with Python, SQL, Microsoft Fabric and Power BI, and automate data preparation workflows.

Administrative Assistant | MSH Multiple Family Office

2022 - 2025 | Madrid, Spain | Part-time

Managed client accounts, operational records and internal documentation. Supported administrative planning, process improvement and coordination across stakeholders.

PROJECT

Fault Diagnosis in Rotary Machines | University of Arkansas

Built a Python machine learning tool to investigate mechanical faults using accelerometer vibration data. Integrated acquisition, time-domain and FFT feature extraction, classifiers and an interactive recording and analysis workflow. Current repository includes 39 automated tests and traceable extraction from 975 original 25 RPM measurements; historical data limitations are documented.

EDUCATION

M.S. Statistics and Computational Analytics | University of Arkansas

2025 - 2027 | Expected graduation: May 2027

Exchange Year | University of Arkansas | 2024 - 2025

B.S. Telecommunication Technologies Engineering | Universidad Carlos III de Madrid

2019 - 2024

International Baccalaureate / Dual American Diploma | Academica Studies

2017 - 2019 | Honors (A-)

TECHNICAL SKILLS & LANGUAGES

Data & BI: Python, SQL, Microsoft Fabric, Power BI, Pandas, NumPy, Excel

Methods: Statistical analysis, machine learning, signal processing, feature extraction, AI agents, semantic models and evaluation

Engineering: MATLAB, C, Java, VHDL

Languages: Spanish (native); English (advanced, CEFR C1)
