

VICTOR MANUEL CABALEIRO VALADO

Fayetteville, AR, USA +1 (479) 799-6170 | [Email](#) | [LinkedIn](#) | [GitHub](#)

PERSONAL SUMMARY

Graduate student in Statistics and Computational Analytics at the University of Arkansas, with a background in Telecommunication Technologies Engineering. Experienced in data analysis, statistical modelling, machine learning, Python-based analytics, and AI-driven solutions through roles as Data Analyst Graduate Assistant and AI Innovation Analyst Intern. Analytical, motivated, and comfortable in multidisciplinary and international environments.

SKILLS SUMMARY

- Experienced in Data Analytics: Microsoft Fabric, Power BI, Pandas, NumPy, Microsoft Excel.
- Experienced in AI Tools: AI data agents, semantic models, ontologies, and AI-driven workflows.
- Programming Languages: Python, Matlab, C, Java, VHDL
- Project management, multicultural adaptability, quick learner, and effective collaboration

EDUCATION

Bachelor of Science in Telecommunication Technologies Engineering

University Charles III of Madrid | 2019 – 2024  
Exchange program at University of Arkansas | 2024 – 2025

International Baccalaureate  
(Dual American Diploma)  
Academica Studies | 2017 – 2019  
Graduated with Honors (A-)

Master of Science in Statistics and Computational Analytics

University of Arkansas | 2025 – May 2027 (Expected)

ENGINEERING PROJECTS

Predictive Modeling and Data Analysis Project – Madrid, 2023

- Built predictive models on a 1,248-sample dataset using Python, Pandas, and NumPy. Improved performance with standardization, tuning,  $R^2$ , and RMSE evaluation.

Fault Diagnosis in Rotary Machines (Capstone Project) – Arkansas, 2024

- Built a real-time machine learning tool to diagnose rotary machine faults from accelerometer data. Integrated acquisition, feature extraction, classifiers, and user recording/analysis.

WORK EXPERIENCE

Administrative Assistant. MSH Multiple Family Office, Madrid | 2022 – 2025

- Managed client accounts and internal documentation to ensure smooth operations, supported the planning and optimization of administrative processes.

Data Analyst Graduate Assistant. VCFA Strategic Projects Analysts, UARK | 2025 – Present

- Provide statistical and data analysis support for university initiatives, working with structured datasets to clean, analyze, extract insights, and produce clear analytical reports using computational tools.

AI Innovation Analyst Intern. Human Resources, UARK | 2026 – Present

- Develop AI-driven HR solutions with Microsoft Fabric, ontologies, and AI data agents, applying data modeling and machine learning to improve AI workflow accuracy, reliability, and business insights.

LANGUAGES

Spanish: Fluent. Native    English: Fluent. Advanced C1. Academic and professional working proficiency.
