PERSONAL SUMMARY

Graduate student in Statistics and Computational Analytics at the University of Arkansas, with a foundation in Telecommunication Technologies Engineering. Professional experience in statistical analysis, machine learning, Python analytics, and applied AI as a Data Analyst GA and AI Innovation Analyst GA. Skilled in translating complex data into actionable insights, supporting informed decisions, and collaborating effectively across multidisciplinary and international teams.

SKILLS SUMMARY

- Experienced in Data Analytics: Microsoft Fabric, Power BI, Tableau, Pandas, NumPy, Excel.
- Experienced in AI Tools: AI data agents, semantic models, ontologies, and AI-driven workflows.
- Programming Languages: Python, SQL, R, Matlab, C, Java, VHDL.
- Project management, multicultural adaptability, quick learner, and effective collaboration.

EDUCATION

Bachelor of Science in Telecommunication Technologies Engineering
University Charles III of Madrid | 2019 – 2024
Exchange program at University of Arkansas | 2024 – 2025

Master of Science in Statistics and Computational Analytics
University of Arkansas | 2025 – May 2027 (Expected)

International Baccalaureate (Dual American Diploma)
Academica Studies | 2017 – 2019
Graduated with Honors (A-)

ENGINEERING PROJECTS

Global Trade & Supply Chain Analytics | BigQuery & Power BI – 2026
- Analyzed 1.1M electronics trade flows (2012–2024) using BigQuery SQL, Power Query and DAX; built Power BI maps, drill-through and partner concentration metrics.

Azure Operations Data Platform | Python & SQL – 2026
- Built Python and SQL pipelines on Azure Blob/Queue Storage for four demo warehouses.

ML for Rotary Machine Fault Diagnosis | Python – 2025
- Built Python ML models with FFT features from 2,925 recordings and an interactive vibration demo.

WORK EXPERIENCE

Data Analyst Graduate Assistant. VCFA Strategic Projects Analysts, UARK | 2025 – Present
- Provide statistical and data analysis support for university initiatives, working with structured datasets to clean, analyze, extract insights, and produce clear analytical reports using computational tools.

AI Innovation Analyst Intern. Human Resources, UARK | 2026 – Present
- Develop AI-driven HR solutions with Microsoft Fabric, ontologies, and AI data agents, applying data modeling and machine learning to improve AI workflow accuracy, reliability, and business insights.

Administrative Assistant. MSH Multiple Family Office, Madrid | 2022 – 2025
- Managed client accounts and internal documentation to ensure smooth operations, supported the planning and optimization of administrative processes.

LANGUAGES

Spanish: Fluent. Native **English:** Fluent. Advanced C1. Academic and professional working proficiency.
